The Australian Family & Private Business Survey 1997

(Summary)

Monash University Family & Private Business Research Unit

- "...the impact of generational change on ownership and management an issue which more than 50% of family businesses will encounter over the next 10 years".
- 1. "The response rate to this survey was 30%. Thus, these findings can be viewed as representative of Australian Family Businesses".
- 2. "..family controlled companies are the prevailing form of enterprise.....and the predominant mainstay of most economies".
- 3. "..definitions of what comprises a family firm seem to have focused on three main issues: the extent of ownership and/or management; the degree of family involvement; the availability of family members for generational transfer".
- 4. " some of Australia's largest firms [eg; Bob Jane, Pratt, Hannan, Moran Health Care] indicate that they are family businesses".
- 5. "Over the next 10 years, the retirement of family business owners will accompany the transfer of ownership of an estimated \$607 billion of wealth."
- 6. "Only 22% of owners note having a process for handling conflicting family and business issues." only 8% documented.
- 7. The survey covered 10 sections -
 - Background of the Business
